SCOPE OF WORK

Fleet & Transport Management Web Application

Prepared by Techofay Global Ventures Pvt. Ltd. | Business Development Department

1. Project Overview

- Techofay Global Ventures Pvt. Ltd. will design and develop a customized Fleet & Transport Management Web Application to digitally manage the client's transportation operations.
- The platform will centralize loads, LR numbers, Bilty/consignment documents, vehicles, drivers, customers, multiple locations, trips, freight, deliveries, PDFs, WhatsApp communication, reports and user access.

2. Load Management

- Create and manage transportation loads.
- Automatic Load Number generation.
- Add customer/party, consignor and consignee.
- Add material, quantity, weight, dates, freight, advance, deductions and remarks.
- Assign vehicle and driver.
- Manage load status, search, filters and complete history.

3. LR Number Management

- Automatic or manual LR Number generation.
- Unique LR Number validation.
- Link LR with load, vehicle, driver, customer and Bilty.
- LR-wise search, history and status tracking.
- Generate LR PDF and share through WhatsApp.
- Statuses may include Draft, Generated, Loaded, In Transit, Partially Delivered, Delivered and Cancelled.

4. Multi-Location Load Management

- Add multiple loading/pickup locations and multiple unloading/delivery locations.
- Define location sequence.
- Maintain location-wise material/quantity, contacts, remarks and status.
- Track completed and pending locations.
- Generate consolidated trip/load documentation.

5. Vehicle Management

- Vehicle registration number, type, category, model, manufacturer and capacity.
- Owner/transporter details, chassis number, engine number and registration details.
- Insurance, permit, fitness, PUC and other document information.
- Vehicle status: Available, Assigned, On Trip, Under Maintenance, Inactive or Out of Service.
- Vehicle-wise trip, load and document history.

6. Vehicle Document Management

- Upload RC, Insurance, PUC, Fitness Certificate, Permit, National Permit, Tax documents and other agreed documents.
- Record document expiry dates.
- View/download documents.
- Maintain vehicle-wise document history and renewal tracking.

7. Driver Management

- Driver name, mobile number, alternate number and address.
- Driving Licence number, type and expiry date.
- Emergency contact and other agreed identification details.
- Assign driver to vehicle and specific trips/loads.
- Driver-wise trip, load and delivery history.
- Driver availability and licence expiry tracking.
- Driver document management.

8. Trip Management

- Trip Number, Load Number, LR Number, vehicle, driver and locations.
- Trip start date/time and expected delivery date.
- Freight, advance, additional expenses and remarks.
- Trip statuses: Created, Vehicle Assigned, Loading, In Transit, Partially Delivered, Delivered, Closed and Cancelled.

9. Bilty / Consignment Note

- Automatic Bilty Number generation.
- LR Number, Load Number, date, consignor, consignee, customer and locations.
- Vehicle and driver details.
- Material, quantity, weight, freight, advance, balance and payment terms.
- Remarks, authorized signature and company branding.
- Bilty format customized to the client's approved template.

10. Customized PDF Generation

- LR / Lorry Receipt.
- Bilty / Consignment Note.
- Loading Slip.
- Delivery Challan.
- Trip Sheet.
- Gate Pass.
- Freight Statement.
- Invoice / Payment Receipt where included.
- Load, vehicle, driver and customer reports.
- POD and other mutually agreed documents.
- PDFs can include company logo, GST details, terms, signatures and custom fields.

11. WhatsApp Integration

- Send LR, Bilty, invoices and operational PDFs through WhatsApp.
- Send load, vehicle, trip and delivery information.
- Send customized customer messages.
- Configure status-based messages where supported: Load Created, Vehicle Assigned, Dispatched, In Transit and Delivered.
- Functionality depends on the selected WhatsApp Business/API provider, approvals and template policies. Third-party API/usage charges are payable by the client unless specifically included.

12. Customer / Party Management

- Customer/company name, contacts, email, addresses and GST details.
- Billing and delivery addresses.
- Consignor/consignee information.
- Payment terms.
- Customer-wise load, LR, Bilty and transaction history.
- Customer statements.

13. Location Management

- Location Master for pickup, loading, unloading and delivery points.
- Location address and contact details.
- Customer-specific locations.
- Location-wise load and delivery history.

14. Freight & Charge Management

- Freight, loading, unloading, detention, toll, handling and miscellaneous charges.
- Advance, deductions and balance payable.
- Calculation logic to be finalized according to the client's business rules.

15. Delivery & POD Management

- Delivery status and date/time.
- Location-wise delivery status and quantity delivered/pending.
- Delivery remarks and confirmation.
- POD upload, attachment to LR/load/trip, download and WhatsApp sharing.

16. Dashboard

- Total, today's, pending and completed loads.
- Active trips and pending deliveries.
- Vehicles available/on trip/under maintenance.
- Drivers available/on trip.
- Pending PODs.
- Freight, advance and outstanding summaries where applicable.

17. Reports

- Load, LR, Bilty, vehicle, driver, trip, customer and location reports.
- Delivery and POD reports.
- Freight, expense and payment reports.
- Pending/completed load reports.
- Vehicle utilization and driver trip reports.
- Date-wise, customer-wise, vehicle-wise, driver-wise and status-wise reports.
- Export/download options in agreed formats.

18. User & Role Management

- Super Administrator, Administrator, Transport Manager, Fleet Manager, Operations Manager, Data Entry Operator, Accounts User and Management User roles as required.
- Role-based, module-wise permissions for view, add, edit, delete and administrative actions.

19. Search & Filters

- Search by LR Number, Bilty Number, Load Number, Trip Number, Vehicle Number, Driver, Customer, Consignor, Consignee, pickup/delivery location, date, status and payment status.

20. Admin Panel

- Manage users, customers, vehicles, drivers, locations, loads, LR, Bilty, trips, documents, reports, templates, WhatsApp settings and company configuration.

21. Security & Access Control

- Secure login and password protection.
- Role-based access control.
- Restricted administrative access.
- Database access controls.
- HTTPS/SSL where deployed.
- Backup provisions based on agreed hosting configuration.

22. Responsive Web Application

- Responsive interface for desktop, laptop, tablet and mobile browsers.
- Interface designed for transport operators, fleet teams, accounts teams and management.

23. Document Template Customization

- Customize LR, Bilty, invoice, trip sheet, delivery challan, POD and letterhead formats.
- Configure company logo, address, GST details, terms, signatures and custom fields.
- Final templates require client approval before implementation.

24. Deployment & Handover

- Production deployment on agreed hosting/server environment.
- Admin credentials and basic user orientation/training.
- Approved document templates and basic system documentation.
- Source code/database handover only where included in the commercial agreement.
- Post-deployment support as per agreed terms.

25. Client Responsibilities

- Provide logo/branding, existing LR/Bilty formats, document templates, vehicle and driver master data, customer/party data, locations, business rules and freight calculation requirements.
- Provide WhatsApp Business/API account and approvals where applicable.
- Provide hosting/server, domain and third-party credentials where required.
- Provide timely approval of UI/UX, workflows and document formats.

26. Scope Exclusions

- WhatsApp/API, hosting/server, domain, SMS, payment gateway and other third-party subscription/usage charges unless expressly included.
- GPS tracking hardware, vehicle tracking devices, fuel sensors and RFID hardware.
- Mobile application development unless specifically included.
- Government/transport authority API charges.
- Third-party software licensing.
- Accounting/ERP integrations unless specifically included.
- Any functionality outside the finalized SOW will be treated as additional scope and may be separately quoted.

FINAL DELIVERABLE

Fleet Management + Vehicle Management + Driver Management + Load Management + Multi-Location Transportation + LR Number Management + Bilty Management + Trip Management + Customer/Party Management + Location Management + Freight & Charges + Delivery + POD + Customized PDF Generation + WhatsApp Integration + Dashboard + Reports + User & Role Management + Document Management.

The final workflow, fields, calculations, LR/Bilty formats, PDF templates, WhatsApp workflows and reports will be finalized during requirement gathering and UI/UX approval before development commencement.
